

At **OTUS Group**, we understand that government organizations are under intense pressure to demonstrate how they deliver results. While demands for programs and services continue to increase, government organizations continue to face significant budgetary pressures.

For over twelve years we have helped numerous government organizations to solve complex challenges while at the same helping them to enhance their own capabilities.

Our experience includes the recent completion of a comprehensive financial management capacity assessment for the Government of Nunavut. This project involved extensive consultation with GN's financial management community and provided in-depth insight into the GN's financial management operations, challenges and opportunities for improvement.

It all starts with a conversation. Discover for yourself how numerous public sector organizations have gained valuable insight that helped them to solve even their most complicated problems.

Call us. Our clients would say it is the wisest call they ever made.

Risk Management

Understand Risks That Could Impact Your Organization.

Far too many organizations - about 75%, in fact - do not proactively work to identify uncertainties and risks that could negatively impact them. Do you spend too much time responding to unforeseen problems? Do you know the top five risks that could impact your organization? A known risk is much less threatening than being blindsided by one. OTUS Group's approach to risk management will give you greater peace of mind.

Our Expertise Includes:

Financial Management, Risk Management, Organizational Design, Planning, Systems, and Economic Development.
